→ SPYNEL Critical Infrastructure Surveillance

Spynel-M

INFRARED RADAR | **for WIDE AREA SURVEILLANCE**

LIGHTWEIGHT PANORAMIC THERMAL SURVEILLANCE SYSTEM

SPYNEL-M is the latest in the Spynel series and benefits from HGH's 15-year expertise in automatic intrusion detection and tracking systems, for wide area surveillance applications. SPYNEL-M is a high-resolution panoramic thermal camera, acting as an infrared radar. Robust, lightweight, transportable, SPYNEL-M is easily carried in a backpack. It can be fixed on top of a building, or quickly and discreetly deployed on a light mast, to perform multi-event detection over extremely large areas in total darkness. Consuming only 8 watts of power, it can be operated with solar or alternate power supply systems to allow remote, disconnected operation. Requiring no maintenance, SPYNEL-M brings the highest technology at a fair cost for the surveillance of critical infrastructures.

HIGH-END SITE PROTECTION DEPLOYED IN MINUTES

SPYNEL-M continuously captures full panoramic images every second, or can perform sector scanning at a higher rate, to bring real-time security against conventional and asymmetrical threats. It can also operate in staring mode at fastest rate, for target recognition. A single SPYNEL-M sensor can perform 24/7 early human intrusion alerts over a 1.5km-diameter area and can be quickly deployed and configured. Any threat will be tracked at any time from any direction, including hardly detectable targets such as: crawling men, RHIBs, low altitude air targets, UAVs and stealth aircrafts. SPYNEL-M can replace up to 16 traditional cameras in one single sensor head. As a completely passive system, the SPYNEL-M is invisible to intruders, requires no additional illumination and cannot be tricked by camouflage nor jamming.

→ SPYNEL-M INFRARED RADAR

APPLICATIONS

- Critical infrastructure protection (power stations, data centers, dams, prisons, water treatment stations, solar and wind farms, oil depots, ammunition dumps …)
- 24/7 perimeter security
- 360° detection of asymmetrical threats
- Airport / airfield surveillance
- Port monitoring
- Special Operation Forces
- VIP and event security

BENEFITS

- Cost effective, low power consumption and reliable surveillance system
- Full 360-degree panoramic coverage with a single sensor
- Day and night panoramic scrutiny even in adverse weather conditions
- Flexible and easy configuration of the covered area

- Automatic tracking of all threats with superior image quality
- Compact, robust, lightweight equipment, for a fast deployment and an easy installation
- Fully passive system, totally undetectable unlike radar
- Uncooled IR technology, maintenance-free system

Power Consumption	8 W	8 W	8 W	8 W
Operating Temperature Range	-40°C / +55°C	-40°C / +55°C	-40°C / +55°C	-40°C / +55°C
Protection Standard	IP 66	IP 66	IP 66	IP 66
Detection Range For				
Human :	Up to 250 m	Up to 400 m	Up to 400 m	Up to 700 m
Car :	Up to 600 m	Up to 900 m	Up to 900 m	Up to 1,500 m

➤ CONTROL AND DISPLAY SOFTWARE

Operating system: PC Windows – multiple screen and touch screen capabilities

Software functions: Get full advantage of Spynel sensor with Cyclope software. Cyclope provides, at a glance, **real time panoramic display** (360° strip, annular, radar & zoom views), **3D detection** capabilities, **unlimited targets designation and tracking**, immediate **threat location** (azimuth, elevation, distance), GPS, AIS and radar **data integration**, automatic **control of PTZ** systems for target identification, **forensic capabilities** (timeline, sequence storage and playback), spatial and temporal bookmarks, multiple **threats displayed on situation map**, fine **image stabilization** and more...
