# Spynel-S

**WIDE AREA**

**SURVEILLANCE SYSTEM**

## ➤ 360° INTRUSION DETECTION, ANYWHERE, ANYTIME

Spynel is a unique wide-area surveillance system, acquiring real-time full panoramic images with automatic intrusion detection and tracking capabilities. It provides powerful situation awareness through 360 degree visualization of the surroundings. As a completely passive thermal sensor, it is invisible to intruders, not vulnerable to camouflage nor jamming, and operates 24/7, whatever the weather. With a large MWIR focal plane array, Spynel-S exhibits high performance, including in warm and humid regions.

## ➤ EARLY TARGET DISCRIMINATION FOR FAST REACTION

Compact and robust, Spynel can be quickly deployed to perform multi-events detection over extremely large areas in total darkness, fog, smoke. An unlimited number of tracks are immediately recognized in highly resolved images, including hardly detectable threats, such as small, slow or tangentially moving targets. It can be used as a reliable and cost-effective standalone perimeter security solution as well as an added layer of capability to systems already in place.
