TODAY'S SEMINARS AND SYMPOSIUMS

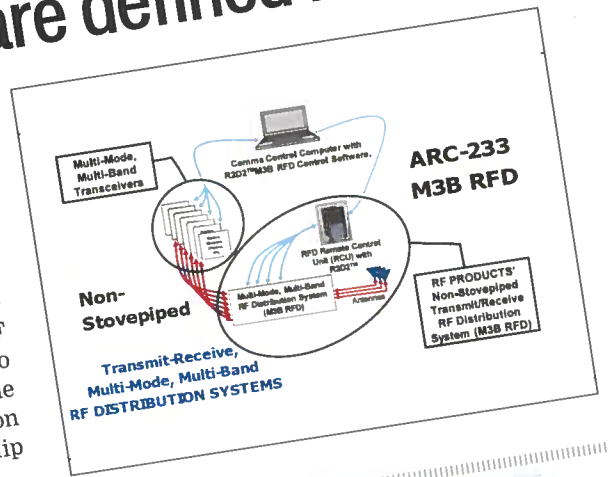

Oct.14 (Fri) 10:00~11:20
Development of the Whole Commercial Aircraft, and the Future Business Prospects
MRJ - The Next Generation Regional Jet
Mr. Hiromichi Morimoto
 President & CEO, Mitsubishi Aircraft Corporation

14-OCTOBER-2016 DAY THREE

Nippon Aircraft Supply introduces advanced RF distribution system for modern software defined radios

Nippon Aircraft Supply is exhibiting a fully functional interactive Remote Control RF Distribution Digital Dashboard (R2D2) at the show. R2D2 is part of RF PRODUCTS INC.'s multi-mode multi-band RF distribution system (M3B RFD). The M3B RFD is the first and still the only RF distribution system with a US "ARC" Type designation. A shipboard version of the M3B RFD is now in production for the Australian ANZAC frigate communications upgrade with ARC-210 radios. RF PRODUCTS have been reducing crosstalk interference and antenna population

on military aircraft and ships for a long-time. The new generation M3B RFD system also provides reconfigurable non-stovepipe capability to military aircraft and ships. R2D2 enables communications operators to reconfigure aircraft communications during a mission to easily change connectivity during hostile, humanitarian, or combination of both missions. The most complex radio management functions of a collocated radio system are automated by R2D2 so that the warfighter can concentrate on the mission and not on configuring the aircraft or ship communications. ■

October 14, 2016 – Japan International Aerospace Exposition 2016:
 Nippon Aircraft Supply and RF PRODUCTS' M3B RFD with R2D2™ were selected by Show Daily Editors to feature in their magazine. Show Daily is a publication of SAP Media Worldwide Ltd. with exclusive rights at many major exhibitions around the world. Nippon Aircraft Supply and RF PRODUCTS were among the few selected each day for a feature article from this year's 792 exhibiting companies at JA2016 which had over 30,000 attendees. Nippon Aircraft Supply represents RF PRODUCTS' sales and marketing in Japan.
